

SOLUTION OVERVIEW

ICx is a digital tactical worksheet with integrated accountability. It is intuitively laid out and has a quick learning curve, Utilizing a digital command board, tactical worksheet and accountability tool ensures the ability to access more information quicker than traditional methods. Our intuitive design combines modern technology with a traditional tactical worksheet feel.

BENEFITS

- Increased Situational Awareness
Equals Safer Scenes
- Increased Command Post
Organization Equals Safer Scenes
- Outstanding Tactics and Strategy
Training Tool for Fire Officers
- Better Documentation

KEY FEATURES

CLEAN AND INTUITIVE DESIGN

Emulating the ease of a traditional tactical worksheet, ICx is the simplest to learn product on the market for command and control of emergency incidents.

EASILY CUSTOMIZED

Configuring ICx for your department's needs is simple. You can build custom incident templates, custom benchmarks and checklists, and any assignments that you would ever make.

INTEGRATED ACCOUNTABILITY

Using ICx will provide an accurate accounting of who is working for who, and where. Couple that with integrating schedules, such as FireRoster, and you will have accountability down to every member on your scene.
